

## LUNALEDs WLB-01M 1W LED UPGRADE KIT FOR THE 2AA MINI-MAGLITE® FLASHLIGHT

The LunaLEDs WLB-01M is the LED kit used to upgrade Mag Instruments Mini-Maglite® 2AA flashlight by replacing the incandescent bulb with the high quality 1 watt LED (with CREE® chip) to provide a typical 52 lumens (32 lumens minimum) of light. The pure white 1W LED combines InGaN and SiC technologies to emit very high brightness light - 52 lumens with 1 watt power consumption only. Compared with other 1W LED products, the new LunaLEDs WLB-01M uses higher efficiency LED chip to provide high light output and generate less heat and extend batteries life. The LunaLEDs WLB-01M is driven by AVANT TECHNOLOGIES light engine which ensure constant current output in maintaining stable light output.

### Features

- ◆ Pure white light - LunaLEDs WLB-01M offers cool lighting compared with incandescent bulb yellow lighting.
- ◆ Brightest light - LunaLEDs WLB-01M offers very high brightness output (52 lumens) with 1W power.
- ◆ Longer lifetime - the lifetime of WLB-01M is about 100,000 hours (about 10 years).
- ◆ Longer batteries life - LunaLEDs WLB-01M operate up to 6 times longer than incandescent bulb.

**Retail price: USD 25.99**

### Specifications

Input voltage: 2.4V or 3.0V (Ni-MH rechargeable and alkaline batteries compatible)

Luminous flux: Typ. 52 lumens (Min. 32 lumens)

CCT: Typ. 6500K day light

CRI: Typ. 70

View angle: Lambertian 120 degree

The LED upgrade kit includes a 1W pure white high power LED with DC/DC converter, a collimator and an O-ring.

Made in Hong Kong.

MAGLITE® is the registered trademark of MAG Instrument, Inc.

CREE® is the registered trademark of CREE, Inc.
